#### Habitat components found at this site:

**Food:** \_\_\_\_\_

**Water:** \_\_\_\_\_

**Shelter:** \_\_\_\_\_

**Space:** \_\_\_\_\_

*Using your observation skills, walk through the habitat and search for these specific sagebrush steppe habitat aspects. Place a tally mark next to each aspect each time you observe it. If there is anything interesting you come across, write a description of your findings. You will discuss the habitat assessment results at the end.*

Sagebrush steppe Habitat Aspect	Tally	Interesting Observations
<b>Large area of native grasses and herbs</b> (soft stemmed plants)		
<b>Large area of sagebrush and other shrubs</b>		
<b>Scattered, mature junipers, with no more than 10% canopy cover</b> (mature junipers will have a rounded top, broken branches, & lichen growth)		
<b>Signs more management is needed</b> (examples may be young junipers or cheatgrass)

## Student Journal: Sagebrush Steppe Habitat Assessment

✓Fledglings

*Using the information on the previous page and the chart on this page, answer the following questions.*

Sagebrush Steppe Habitat Aspect	Associated Obligate Bird Species
Large area of native grasses and herbs	Grasshopper Sparrow
Large area of sagebrush and other shrubs	Sage Grouse, Sage Sparrow, Brewer's Sparrow
Scattered, mature junipers	Ferruginous Hawk, Chipping Sparrow, Raven

1. Which habitat aspect did you find the most of? Which bird species are most dependent on this habitat aspect?
  
  
  
  
  
  
  
  
  
  
2. How many mature juniper trees did you come across during your observation? What information does that give us about the health of this habitat?
  
  
  
  
  
  
  
  
  
  
3. Did you see any evidence of juniper management? What evidence did you observe?
  
  
  
  
  
  
  
  
  
  
4. Given your assessment results, do you think that this sagebrush steppe habitat is healthy or do you think it needs more management? Why?
